

## Your contribution to mobility and safety of tomorrow!

What do aircraft, trains and military (air) vehicles have in common? They are equipped with increasingly complex, safety-critical electronic systems. SPHEREA's test systems ensure the mobility and safety of these complex systems even tomorrow. Would you also like to support to keep these systems safe? Then become part of our young, dynamic and excellent team as:

## Electrician / Electronics Technician / Electrical Installer / Mechatronics Technician (m/f/d/x)

### These are your main tasks

- Collaboration in the service team for all services for our test systems (installation, repair, calibration, maintenance) at our site in Ulm
- Installation support for our test equipment together with our development department
- Preparation of customer deliveries as well as integration and internal acceptance
- Observing technical instructions and quality assurance regulations
- Ensuring a professional working environment including our laboratories and integration areas
- Supporting incoming goods / outgoing goods and internal service activities

### This is our offer

- Exciting, technical challenging projects within a dynamic team with an excellent working atmosphere
- A growth-oriented environment with individual development perspectives
- Remuneration according to tariff of the metal and electrical industry and working in modern laboratories and offices
- Extensive social benefits, e.g. company pension, flexible working hours, assistance in finding accommodation and moving

### These skills are needed

- Completed professional training in the field of electrics, electronics, mechatronics and good technical understanding
- Ability to work according to technical instructions and implement corrective measures in case of deviation
- Experience in troubleshooting of electronic systems
- Good written and spoken English
- Work experience in the relevant environment is desirable

### About us:

We are a medium-sized company for development, production and service of test systems in small and very small series. We accompany the project from the initial idea to implementation and service. In close cooperation with our customers, we develop specific, complex electronic test solutions in a safety-critical environment with 40 employees in Ulm.

We look forward to receiving your detailed application, stating your salary expectations and your earliest possible starting date!
