

Your contribution to mobility and safety of tomorrow!

What do aircraft, trains and military (air) vehicles have in common? They are equipped with increasingly complex, safety-critical electronic systems. SPHEREA's test systems ensure the mobility and safety of these complex systems even tomorrow. Would you also like to support to keep these systems safe? Then become part of our young, dynamic and excellent team as:

System Engineer (m/f/d/x)

These are your main tasks

- As system engineer for test systems, you shape the product to be developed from the analysis of the requirements to the acceptance and service at the customer.
- As the technically responsible person, you will support the project management in coordinating the engineers in the project team, managing external service providers and in external technical communication.
- As part of the project team, you will independently define, execute and finish work packages and help all other engineers find solutions to technical problems.
- You support our sales department with technical concepts, customer discussions and cost estimates.

This is our offer

- Exciting, technical challenging projects within a dynamic team with an excellent working atmosphere
- A growth-oriented environment with individual development perspectives
- Salary according to tariff of the metal and electrical industry and working in modern laboratories and offices
- Extensive social benefits, e.g. company pension, flexible working hours, health management
- Working in an outstanding company as winner of the German Excellence Award in Bronze

These skills are needed

- Engineering or scientific studies
- Several years of practical professional experience in project development
- Experience in measurement technology (e. g. analog, digital, digital data buses, high frequency)
- Good hardware and software knowledge
- Experience with the development, integration and validation of technical products
- Social competence, ability to work in a team, motivation and initiative
- Experience and familiarity with our markets are helpful
- Good knowledge of English in technical fields as well as a process-oriented way of working

About us:

We are a medium-sized company for development, production and service of test systems in small and very small series. We accompany the project from the initial idea to implementation and service. In close cooperation with our customers, we develop specific, complex electronic test solutions in a safety-critical environment with 40 employees in Ulm.

We look forward to receiving your detailed application, stating your salary expectations and your earliest possible starting date!
