

Your contribution to mobility and safety of tomorrow!

What do aircraft, trains and military (air) vehicles have in common? They are equipped with increasingly complex, safety-critical electronic systems. SPHEREA's test systems ensure the mobility and safety of these complex systems even tomorrow. Would you also like to support to keep these systems safe? Then become part of our young, dynamic and excellent team as:

Junior Project Manager (m/f/d/x) for Test systems

These are your main tasks

- Management of complex projects from conception, planning and control to implementation at the customer's site
- Management of internal project organization and external partners
- Independent planning and control of larger project budgets
- Responsibility for cost monitoring, adherence to schedules and quality
- Leadership of the project team and close cooperation with the PMO and System Engineering
- Project communication both internally and towards customers, external partners and suppliers
- Execution of customer reviews and acceptances
- Ensuring efficient risk and opportunity management
- Contribute to the preparation of comprehensive project orders and customer quotations

This is our offer

- Working in an outstanding company as winner of the German Excellence Award in Bronze
- Support in becoming an experienced project manager with individual development perspectives
- A growth-oriented environment and a dynamic team with an excellent working atmosphere
- Salary according to tariff of the metal and electrical industry
- Extensive social benefits, e.g. company pension, flexible working hours, assistance in finding accommodation and moving

These skills are needed

- Completed studies in communications engineering, electrical engineering or comparable
- First experience in project management
- PMP or IPMA certification is an advantage
- Good knowledge and experience in the application of project management tools and methodology
- Medium-sized company orientation coupled with a hands-on mentality
- Ideally, industry experience in aerospace, defense technology, railroad industry from a large project environment
- Analytical and conceptual thinking, high result orientation as well as distinct technical understanding
- Business fluent in German and English
- Willingness to travel within Europe to a limited extent

About us:

We are a medium-sized company for development, production and service of test systems in small and very small series. We accompany the project from the initial idea to implementation and service. In close cooperation with our customers, we develop specific, complex electronic test solutions in a safety-critical environment with 40 employees in Ulm.

We look forward to receiving your detailed application, stating your salary expectations and your earliest possible starting date!
