

Your contribution to mobility and safety of tomorrow!

What do aircraft, trains and military (air) vehicles have in common? They are equipped with increasingly complex, safety-critical electronic systems. SPHEREA's test systems ensure the mobility and safety of these complex systems even tomorrow. Would you also like to support to keep these systems safe? Then become part of our young, dynamic and excellent team as:

Commercial employee (focus on sales and purchasing) (m/f/d/x)

These are your main tasks

You will work in the team of our commercial management in two areas that contribute significantly to the success of SPHEREA: purchasing and sales. You will have the following main tasks, which you will implement independently and on your own responsibility:

- Collaboration in the preparation of offers and calculations in our sales team
- Creating reports on sales activities and monitoring deadlines
- Creating reports on supplier evaluations
- Independently placing administrative orders and standard project components; this also includes purchasing controlling with deadline monitoring and invoice verification
- Independent implementation of administrative tasks

This is our offer

- Exciting projects at the winner of the German Excellence Award 2018 in bronze
- Accompaniment and support in the individual development perspective
- A growth-oriented environment and a dynamic team with an excellent working atmosphere
- Salary according to tariff of the metal and electrical industry
- Extensive social benefits, e.g. company pension, flexible working hours, assistance in finding accommodation and moving
- A certified, family-friendly company

These skills are needed

- Business administration degree or completed commercial training with corresponding professional experience
- Initial professional experience in the area of supply chain or sales management is an advantage
- Medium-sized company orientation coupled with a hands-on mentality
- Analytical and conceptual thinking, high result orientation as well as technical understanding
- Good knowledge of German and English

About us:

We are a medium-sized company for development, production and service of test systems in small and very small series. We accompany the project from the initial idea to implementation and service. In close cooperation with our customers, we develop specific, complex electronic test solutions in a safety-critical environment with 40 employees in Ulm.

We look forward to receiving your detailed application, stating your salary expectations and your earliest possible starting date!
