

## 3RD SPHEREA FORUM AND ANNIVERSARY CELEBRATION

The third Spherea Forum is a proven platform where people from different industries can exchange information and learn from each other. The focus is on increasing the availability of all types of vehicles through efficient maintenance based on innovative test solutions. Be part of the third Spherea Forum and immerse yourself in the world of testing, take the opportunity to think outside the box. At the same time, we will be celebrating our 10th anniversary in June 2024, which we look forward to celebrating with you at the forum.

### PARTNER CONFERENCES

The Spherea Forum is accompanied by conferences by various partners. Participation is only possible for the respective members, but there is an opportunity for exchange between the participants during the Forum. Information on the conferences taking place can be found on our registration page:

[www.spherea.de/en/10-years-of-spherea/](http://www.spherea.de/en/10-years-of-spherea/)

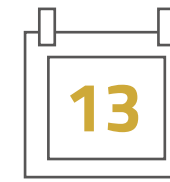

**12. - 13. JUNE 2024**  
**ULM, GERMANY**

## SPHEREA FORUM

AVIATION - DEFENSE - RAILWAY

network  
exchange  
learn from each other

The world of Spherea was created in 2014 and has continued to evolve. However, the Spherea world cannot exist on its own and is part of a universe. It contains ecosystems that are essential for the survival of the Spherea world:

**Without the aerospace ecosystem, the Spherea world would never have come into being.**

**Without the „defense“ ecosystem, the Spherea could never make their contribution to security.**

**Without the „railroad“ ecosystem, the world of Spherea would never grow and contribute to mobility.**

**Without the ecosystems with customers, small and large companies, suppliers and partners, associations and service providers, the Spherea Group and finally with our employees, the Spherea world would not function.**

At first glance, the ecosystems mentioned above do not appear to have much in common, apart from the aspect of mobility. On closer inspection, however, there are many similarities. It therefore makes sense to network and exchange ideas beyond the boundaries of the individual organizations. This is precisely the platform we are offering on the occasion of our 10th anniversary. Let's uncover more similarities between the aviation, defense and rail sectors, learn from each other and talk about the topics of the future, such as the use of artificial intelligence. Only together can we master the major challenges of the future.

- 14:00:** Registration
- 15:00:** Opening of the Spherea Forum - Best of Spherea
- 15:30:** Keynotes
- 16:00:** Panel discussion: Automation, digitalization and artificial intelligence
